# Anomaly Detection

Sept. 11, 2014	17 signal events
June 1, 2013	22 signal events
February 18, 2014	6+ signal events

The graph to the right demonstrates one of the signals that we find as likely indicative of something occurring related to the geomagnetic storm activity and strength at the time.

- Green - PMU data
- Blue - Magnetometer readings
- Red - PingThings anomaly detector
