

# Engineering Analysis Task Team Report-Out

NASPI EATT Break-Out Session

March 2016

# Updates

## Technical Presentations:

- Novel methods to assess secure power transfer capabilities - *STRI*
- Situational awareness in generation/system control centers of synchronous generators' damping performance – *Clemson*

## EATT Work Products:

- Phase Angle Calculations: Considerations and Use Cases
  - **Final Report to be presented at Fall 2016 NASPI WG Meeting**
- Integrating Synchrophasor Technology into Power System Protection Applications
  - **Looking for protection experts to participate in this effort**
  - **Expected wrap-up by Fall 2016 NASPI WG Meeting**
